

Naveen M

mnaveenm2004@gmail.com | +91 8667482293 | Chennai, Tamil Nadu

OBJECTIVE

Software Engineering undergraduate specializing in Full-Stack Development, AI Applications, and Distributed Systems. Experienced in building production-ready platforms using Java, React, Spring Boot, Node.js, and Cloud Technologies with a strong focus on scalability and problem-solving.

EDUCATION

SAVEETHA ENG. COLLEGE
B.E. COMPUTER SCIENCE (IoT)
Aug 2022 - Apr 2026
Chennai, India

SKILLS

LANGUAGES

Java • C++ • Python • JavaScript

BACKEND

Spring Boot • Node.js • Express.js •
REST APIs • WebSockets • JWT

FRONTEND

React.js • HTML5 • CSS3

DATABASES

MySQL • PostgreSQL • MongoDB •
Firebase

TOOLS & DEVOPS

AWS • Docker • Git • Postman •
Agile/Scrum • Version Control

TESTING

Selenium • TestNG • Testing
Frameworks • JMeter • Automation
Testing • Test Scenarios • Unit Testing

CORE CS

DSA • OOPs • DBMS • OS • CN •
System Design

SOFT SKILLS

Analytical Thinking • Adaptive Learner
• Team Collaboration • Leadership •
Communication

EXPERIENCE

Connect Infosystem - Java Full-Stack Developer Intern June 2024 - July 2024 | Chennai

- Developed and delivered a fully functional e-commerce platform for computer accessories using React.js and SQL, building responsive UI components from scratch that ensured a consistent, polished experience across Chrome, Firefox, and Edge, cutting reported UI bugs by nearly 40% through thorough QA testing.
- Designed the relational database structure alongside a 4-member team, rewrote inefficient SQL queries using indexing and optimized joins, and resolved 15+ critical layout inconsistencies before launch, resulting in faster page loads and a much cleaner user experience.
- Took ownership of cross-browser testing and UI validation across the full site, identifying and fixing edge-case rendering issues that would have impacted users post-release, which helped the team ship with confidence and reduced post-launch fixes significantly.

PROJECTS

PitShop Mechanix [🔗](#) | <https://pitshop-mechanix.onrender.com>
React.js, Java, Spring Boot, MongoDB, WebSockets, AI

- Built REST API endpoints in Spring Boot with MongoDB handling bookings, mechanic discovery, and AI-powered vehicle diagnostics, structuring the codebase into modular, testable service layers.
- Implemented JWT-secured, role-based access control to separate client and mechanic views, and debugged and tuned the Render deployment to consistently achieve sub-2s load times across all key pages.
- Crafted a full-stack mechanic-driver marketplace where drivers locate nearby mechanics on an interactive Leaflet.js map, request service, and track the client live via WebSockets.

Void Park [🔗](#) | <https://void-park.onrender.com>
React.js, Express.js, PostgreSQL, REST APIs, JWT

- Designed and built a parking slot sharing platform end to end, with Express.js API endpoints backed by a normalized PostgreSQL schema that eliminates double bookings and maintains data integrity even under concurrent requests.
- Crafted the React frontend with real-time slot availability updates, location-based search, and a smooth booking flow that gets users to a confirmed spot in just a few clicks, secured with JWT authentication and deployed on Render for reliable uptime.

Smart Dam Automation System [🔗](#) | <https://damflow.vercel.app>
C++, Python, React.js, ESP32, MongoDB, MQTT, LoRA, Yolo V8, ML

- Programmed an ESP32 microcontroller to interface with 6 sensor types and trigger automated valve responses in real time, replacing manual monitoring routines and cutting oversight effort by approximately 60% while making dam operations considerably safer.
- Wired the IoT hardware to a cloud backend and built a live React.js dashboard for real-time data visualization, threshold-based alerts, and an ML model that detected anomalies early and helped the operations team act before issues escalated.

CERTIFICATIONS

- Cloud Computing (NPTEL)
- Software Engineering (J.P. Morgan's)
- Software Testing & QA (Udemy)
- Associate Cloud Engineer (Google)
- Efficient LLM Customization (NVIDIA)
- Java Full Stack (Wipro)
